A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 1, 2003 has been entered.

Claims 10-20, 25, 39, and 40 are allowed.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9, 21, 22, 26-38, and 41-52 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Heikkila et al (WO 92/16542) for the reasons set forth in rejecting the claims in the last Office action. The new claims are not seen to influence the conclusion of unpatentability previously set forth.

Heikkila et al teach anhydrous crystalline lactitol as is claimed (see entire document). Heikkila et al also teach the combination of lactitol with other sweeteners such as saccharin and xylitol (see page 5, lines 3-19). The unit cell constants would be inherent and/or obvious to that of Heikkila et al as Applicant claims "about" for these values.

Applicant's arguments filed December 1, 2003 have been fully considered but they are not persuasive.

Applicant argues that the prior art is not directed to the  $\beta$ -form of lactitol.

It is not seen where the claimed invention differs from that of the prior art. Heikkila et al teach crystalline anhydrous lactitol which is the same as that claimed. It is not seen where Heikkila et al exclude the  $\alpha$ -form of lactitol.

All of the claim limitations and arguments have been considered.
